

Euris evolves and strengthens its development in the e-health market.

Paris - 26/02/2018. Cloud Santé® and Euris now form a single group dedicated to connected health.

Euris is now organized around three main business lines **exclusively dedicated to health:**

- **Euris Health Digital Solution** : innovative digital solutions for pharma, insurers and healthcare providers : CRM, CLM (Closed-Loop Marketing), Business Intelligence, PRM (Patient Relationship Management) and Social Media Listening.
- **Euris Health Data Hosting** : a global health data hosting infrastructure, compliant with international certifications : HDS & ISO 27001 (Europe), HIPAA (USA), CSL/PHIMM (China), proposed by our entity Euris Health Cloud® (international) and Euris Cloud Santé® (in France).
- **Euris Health Cloud® Marketplace** : a unique catalog of certified technologies and services, meeting the operational needs of e-health projects: Storage and data sharing, Security and Data Analytics, Prevention & Telemedicine.

The excellent knowledge of the e-health environment, its constraints and its opportunities allows Euris to offer a complete and unique value chain, from data hosting to health digital solutions.

In this context, a new website group is now available on euris.com, with all information about data hosting, ehealth marketplace and digital health solutions. A new corporate video is also available on YouTube and on the Chinese platform Youku.

A sustained growth in France and abroad

Also present in Shanghai, Euris pursues its international development strategy and shows its ambition : to support innovation, in compliance with ethical and protection values, by providing e-health solutions with a high use value for industrial companies.

In 2018, Euris will pursue the development of its global infrastructure and will pursue its secure identity management research and development program to promote interoperability and effectiveness of connected health services.

Pedro LUCAS, Euris CEO :

« This step confirms the ambition of our strategy: health innovation in its multi-territory dimension, and our commitment alongside our customers in their e-health projects, in France and abroad.

In 2018, we will pursue our commercial expansion, and above all, continue to play our role of new ehealth services operator »

About :

Group dedicated to the connected health market, Euris supports industrials in the implementation of their e-health projects, from accredited data hosting to digital solutions.

Through its Marketplace, Euris provides a broad catalog of ready-to-use services and technologies to facilitate the deployment of e-health projects : strong authentication, telemedicine, lot ...

Euris is positioning itself as an operator of new connected health services thanks to its multiple partnerships with private and public players specializing in health & digital services.
